EDUCATION

Aug 2024 - Present **University of Texas at Austin** | *Mathematics* Cumulative GPA 3.74
Expected graduation May 2027

Aug 2023 - May 2024 **Colorado State University** | *Mathematics and Computer Science*

SKILLS

Robotics: ROS1 / ROS2, Gazebo, RViz, MoveIt, RGB-D perception, AprilTag, Unity, Unreal Engine, coordinate frames & calibration, socket programming, 6-DoF pose estimation, C++

Machine Learning and LLMs: PyTorch, MediaPipe, OpenCV, transformer models, LangChain, Python

Frontend and Backend Development: AWS (S3, RDS, Lambda), MongoDB, SQL, Redis, NextJS, TypeScript

EXPERIENCE

Autonomous Robots Teaching Assistant **UT Austin** Jan 2026 - Present

- TA for Autonomous Robots (CS 378) focused on social compliance, navigation, and human-robot interaction

Living With Robots Lab **UT Austin** Aug 2025 - Present
Undergraduate Researcher

- Collected and annotated RGB-D handover data using Azure Kinect, AprilTags, and MediaPipe for 6-DoF object pose and 3D hand landmark estimation.
- Trained and evaluated transformer-based trajectory prediction models to forecast receiver hand position and handover timing for anticipatory robot behavior.

Los Alamos National Laboratory **Los Alamos, NM** Jun 2025 - Aug 2025
High Performance Computing Intern

- Built a low-latency socket bridge enabling real-time streaming of visualization edits from desktop tools to XR headsets.
- Developed an XR application for interactive reconstruction and manipulation of large-scale scientific visualizations using natural gesture controls.

Inductive Robotics **Austin, TX** Jan 2025 - Mar 2025
Robotics Engineering Intern

- Developed cloud-based data pipelines for autonomous EV-charging robots deployed in parking lots, supporting ingestion, processing, and analysis of operational data.
- Built a client dashboard showing live parking traffic and charging demand.

Human-Aware Planning & Interaction Lab **Colorado State University** Sept 2023 - May 2024
Undergraduate Research Assistant

- Led development of a robot control system using natural gestures via an augmented reality headset (Meta Quest).
- Developed and maintained the [lab's website](#) and documentation using modern web frameworks.
