WYATT HANSEN

512-701-5597 | wyatt.hansen@utexas.edu | github.com/Kickblip | linkedin.com/wyatt-c-hansen | Austin, TX

EDUCATION

The University of Texas at Austin, Austin, TX — *Graduating December 2027*
Bachelor of Science, Mathematics — *Cumulative GPA 3.65*
Relevant Courses: Autonomous Robots, Probability, Linear Algebra
Honors & Awards: Advanced Research Fellowship

Colorado State University, Fort Collins, CO — *Fall 2023 - Spring 2024*
Bachelor of Science, Mathematics and Computer Science
Honors & Awards: Dean's List, First Place USDA Machine Learning Hackathon

SKILLS

Programming Languages: TypeScript, JavaScript, Python, C++, Java, SQL
Technologies: React, NextJS, Tailwind, MongoDB, Postgres, Figma, ROS, S3 and R2, Node, Socket.io, PyTorch, Git, Linux, Unreal Engine, Redis, Rest APIs, LangChain, Vector Databases, RAG, MCP, Embeddings

EXPERIENCE

UNIVERSITY OF TEXAS AT AUSTIN, Austin, TX — Jan 2026 - Present
Teaching Assistant
- Teaching Assistant for Autonomous Robots (CS 378), leading in-class group activities, mentoring student project teams, and grading research-paper projects in social compliance, navigation, and human-robot interaction.

LIVING WITH ROBOTS LAB, Austin, TX — Aug 2025 - Sep 2026
Undergraduate Research Assistant
- Trained and evaluated transformer prediction models to forecast hand and object motion during human-to-robot object handovers.
- Built a multi-view 3D recording system using synchronized cameras to collect human-to-human handover data and estimate 3D hand keypoints and object poses.

LOS ALAMOS NATIONAL LABORATORY, Los Alamos, NM — Jun 2025 - Aug 2026
Software Engineering Intern
- Built a low-latency socket bridge for real-time streaming of visualization updates from desktop tools to VR/AR headsets.
- Developed a VR/AR application for reconstructing and manipulating large-scale scientific visualizations using natural gesture-based interaction.

INDUCTIVE ROBOTICS, Austin, TX — Jan 2025 - Mar 2025
Software Engineering Intern
- Built cloud-based data pipelines for autonomous EV-charging robots, enabling ingestion, processing, and analysis of real-world operational data.
- Designed and developed a client-facing dashboard for real-time visualization of parking traffic, EV-charging demand, and parking infractions.

HUMAN-AWARE PLANNING AND INTERACTION LAB, Fort Collins, CO — Sept 2023 - May 2024
Undergraduate Research Assistant
- Led development of a gesture-based robot control system using a Meta Quest mixed-reality headset.
- Developed and maintained the lab's website and documentation using modern web frameworks.

PROJECTS

BLUEWARD | *TypeScript, React, Postgres* — Aug 2026
- Built a full-stack web application for Longhorn League of Legends to track game statistics, match history, and internal rankings.
- Recruited and led a small team of student maintainers to support ongoing development.
- Grew the platform to track 200+ players and 2,000+ games across three universities.
